•DECLARATION •

To

The Principal,

Gandhi Education Society's,

KRANTIAGRANI G. D. BAPU LAD MAHAVIDHYALAYA,

KUNDAL

Respected Sir,

We undersigned hereby declare that the project entitled, "**Kesari Tours And Travels**" developed under the guidance of **Mr. Nalwade S.P** is our original work. The empirical finding in this report is based on the information collected by us. We have not copied from any report submitted to Shivaji University Kolhapur. We understand that such copying is liable to the punishment in a way the university authorities fit.

ACKNOWLEDGEMENT

We are very happy to put forward this website "*Kesari Tours and Travels*".

We express my deep gratitude as our guide **Mr. Nalwade S.P.** and Principal **Dr. Lad P. B.** For their guidance and sincere co-operation for completion of this project.

We would like to thank all staff members of our computer department for their guidance and encouragement through the project. We are grateful to our parents and friends who helped us directly or indirectly in completion of this project.

Place: Kundal

Date:

Yours sincerely,

Mr. Pratap Kisan Thorbole

Mr. Rutik Dagdu sarwade

Mr. Mahindra Gajanan Mali

Introduction to Website

The tours and travels management system is a website. The main purpose of “Kesari Tours And Travels” is to provide a convenient way for a customer to book hotels, flight, train and bus for to purposes. The objective of this project is to develop a system that automates the process and activities of a travel agency. In this project we will make an easier task of searching places & for booking train, flight, or bus.

In the present system customer has to approach various agencies to find details of places & to book tickets. This often requires a lot of a time and effort. We provide approach skills to critically examine how a tourist visit and it ability to operate in an appropriate way when dealing with the consequences of a tourism, locally, regionally, and nationally including visitors security & ecological influences. It is tedious for a customer to plan a particular journey and have it executed properly. The project 'Website for kesari tours and travels ' is developed to replace the currently existing system , which help in keeping records of the customer details of destination as well as payment received.

Need and scope of computer system

1. Website Never Sleep:

Many people surf the web in the evening when most businesses are closed, which is perfectly fine because website never take a break. A website will allow your business or organization to be open 24 hours a day, 7 days a week, 365 days a year. Having a website is the equivalent of having an employee working around the clock – even weekend and holidays!

2. Your Top Competitors Has A Website:

If you are in direct competition with another business that has website, they have a clear advantage – especially they are adequately marketing their website. A website is a great way to level the playing field.

3. Just Google It:

More than ever before, people are turning away from traditional means of finding information and looking online, Especially by way of mobile devices. Your business should be at their fingertips when they look in the search engine

4. Website Improve Customer Confidence & Corporate Image:

With the professional website, you will improve your overall impression to the public and in turn, your customer will develop a greater sense in your organization.

5. Small Business Have Higher Revenue:

According to the small business Administration, small businesses that have website are averaging \$1.07 million more per year in sales than businesses not online. That equates to 39% higher revenue.

6. Do you know 247 Million people:

That is the number of Americans that regularly use the internet use the internet . Worldwide internet usage is pushing two billion.

7. Website Helps Establish More Customers:

According to the small Business Administration , 50% of internet sales are from new customers . Having a website significantly improves your customer reach no matter what services or products you offer.

8. Website Are Not Just A Local, They Are Global:

Most small businesses are only able to market to their town and surrounding communities . With a website , you can take your goods and services across American and around the world , if you so choose.

Proposed System

Objectives:

- 1) To study and various control of ASP.NET with the help of SQL tutorial.com website.
- 2) To observe all the functionalities developed by SQL tutorial.com website.

Benefits:

1) User Friendliness:

This Project will have user-friendly screens designed will have very simple functionality for the information.

2) Consistency:

The constancy in the proposed system will high efficiency due to smaller learning curves and increased data integrity.

3) Compatibility:

This project offers great compatibility, as it will be designed with proper methodology, new tools and technology.

4) Security:

This project is secured system, which will provides corporate level security. Also that will enable a user to view/edit/add the information, based on roles and privilege assigned to that user.

5) Reliability & Robustness:

The project built with proper architecture and design it will provide a reliable and robust application to that user.

6) Performance:

The performance of this application will be high because of it is optimize design and sound architecture.

7) Extensibility:

This project has a modules design and would provide the flexibility of adding, future modules to the application.

8) Flexibility:

This project has the flexibility of adding new modules when needed.

Requirement Gathering

Introduction to ASP.NET

What is .net?

.Net is a set of software technology for connecting information, people, system and device. .Net word says that it is related internet. It is a platform which is used to compile and execute programs written by using .Net compatible language.

Blocks for framework architecture:

1. .NET compatible language
2. Common language specification
3. Common type system
4. Framework class library
5. Common language runtime

1. .NET compatible language:

ASP.net, c# .net are languages compatible to .net framework.

2. Common language specification:

These are set of rules designed for .net compatible languages. It helps to enhance and ensure language interpretability by defining a set of features that developer can really on to available in wide variety of language.

3. Common type system:

It is part of CLS. The CLS performs following function:

It is establishes a framework that helps the cross language integral type safely and high performance code execution. Provide an object oriented model that supports the complete implementation of many programming language. Define rules the language must be follows which helps to ensure that 5 object written in language can interact with each other.

4. Framework class library:

It supports collection of predefined class. These classes put under hierarchy of special structure called namespace. In .net "system" is highest level namespace.

5. Common language runtime:

CLR is the heart of the .net framework. It takes care entire execution of application it is also called as managed execution environment.

Introduction to SQL server 2012

SQL stands for Structured Query Language. SQL are used to communicate with a database. According to ANSI (American National Standard Institute), it is the standard language for relational database management system. SQL statements are used to perform task such as update data on a database, or retrieve data from a database. Some common relational database management system that use SQL are: Oracle, Sybase, Microsoft SQL Server, access, Ingres, etc. Although most database system use SQL, most of them also have their own additional proprietary extensions that are usually only used on their system.

However, the standard SQL command such as "Select" ,"Insert," Update" ,"Delete" ,"Create" and "Drop" can be used to accomplish almost everything that one need to do with a database. This tutorial will provide you with the instruction on the basics of each of these commands as well as allow you to put theme to practice using the SQL Interpreter.

Introduction to supportive system

ASP.NET is a web development platform, which provides a programming model, a comprehensive software infrastructure and various services required to build up robust web application for PC, as well as mobile device.

ASP.NET works on top of the HTTP and uses the HTTP command and policies to set a browser-to-server bilateral communication and cooperation. ASP.NET is a part of Microsoft .Net platform. ASP.NET applications are compiled codes, written using the extensible and reusable components or object present in .Net framework. These codes can use the entire hierarchy of classes in .NET framework.

Features of Asp.net 2.0

Performance:

It is now much faster than ASP.NET Core 1.x. It is now more than 20% faster than the previous version. You can check it out now with techempower.com as the following URL shows. Just search asp.netcore on this URL, you will get the result.

Minimum Code:

We need to write few lines of code to achieve the same task. For example, authentication is now easy with a minimum line of code. When we talk about Program's class, ASP.NET Core 2.0 has the minimum line of code in the Main method as compared to the previous version.

.NET Standard 2.0:

The .NET Standard is a group of APIs which are supported by .NET Framework. As compared to the previous version of .NET Standard 2.0 supports dubbed APIs in numbers. More than 3200+ APIs are supported by .NET Standard 2.0.

Visual Basic Support:

With this new release of .NET Core 2.0, Visual Basic is part of .NET Core programming language. Now we can create a different type of application using Visual Basic code as well.

Output from ASP.NET Core Web Server:

In the output window, now we can trace our application using the "ASP.NET Core Web Server" option. This will show you how our application is started and got rendered on the browser. So, each information from starting to render will get you here.

Master Pages:

ASP.NET didn't have a method for applying a consistent look and feel for a whole web site.

Themes:

Themes is another feature of ASP.NET 2.0. Themes, or skins, allow developers to create a customized look for web applications.

Data Access:

Many web sites are data driven, using databases or XML files as data sources.

With ASP.NET this involved code, and often the same code had to be used over and over in different web pages.

USER REQUIREMENT

Performance requirements:

This product work well a fast internet connection. Each link should be easily navigation with less response time.

Software Quality Attributes:

This project will have user-friendly screens. The screens designed will have very simple functionality for retrieving, adding, updating the information.

Consistency:

The Consistency offers great compatibility, as it will be designed with proper methodology, news tools and technology.

Reliability & Robustness:

This project is built with proper architecture and design and it will provide a reliable and robust application to the users.

Performance:

The performance of this application will be high because of its optimize design and sound architecture.

Extensibility:

This project has a modular design and would provide the flexibility of adding, future modules to the application.

Flexibility:

This project has the flexibility of adding new modules when needed.

Feasibility Study

Feasibility evaluates the projects potential for success, therefore perceived objectivity is an important factor in the credibility of the study for potential investors and lending institution.

Five Different Areas of project Feasibility:

1) Technical Feasibility:

Assessment is focused on the present technical resources available in the organization. It studies if the technical resources including the technical team are capable of converting the ideas into working system. It also evaluates the hardware and the software requirement of the proposed system.

2) Economical Feasibility:

Studies enable organization to assess the viability, cost and benefits of project before financial resources are allocated. They also provide independent project assessment and enhance project credibility. It also helps to determine the positive economic benefits to the organization that the proposed system will provide .It include quantification and identification of all the benefits expected. This assessment typically involves a cost/benefits analysis of the project.

3) Legally Feasibility:

Of the project determine whether the proposed system conflicts with legal requirement like any data protection act or any social media law.

4) Operational Feasibility:

Under which we conduct a study to analyze and determine whether Your business need can be fulfilled by using a proposed solution. It also measures how well a proposed system solves the problem, and takes advantages of the opportunities identified during scope definition and how it satisfies the requirement identified in the requirement analysis phase of system development. To ensure success desired operational outcomes must be imparted during design and development. These include such design-dependent

parameters such as reliability, Maintainability, supportability, usability disposability, sustainability, affordability and others.

5) Scheduling Feasibility:

Is the most important in terms of project success. A project will fail if not completed on time. In scheduling feasibility we estimate how much time the system will take to complete and with our technical skill we need to estimate the period to complete the project using some methods.

System in Detail

This website contains all the relevant information of kesari tours and travels information are as follow:

Welcome to our website...

Here you can Travel by sending inquiry to Admin if admin approve as agent then you can work on this website to send inquiry for Agent. Here you can see the Tour Packages and send inquiry for that tour packages.

History Of Organization :

Kesari Tours was established by Kesari Patil in 1984 at the age of 50. Prior starting up his own firm, Kesari Patil was working in his brother's company named Raja Rani. With 21 years of experience as a tour expert, Kesari Patil laid the foundation of Kesari Tours in a rented flat in Matunga with a typist and Sunita Patil, his wife conducting his first tour with a group of 13 people in Rajasthan in 1984. In 1986, Kesari Patil's daughter Veena Patil and his son Shailesh Patil joined as Directors.

Conclusion

The project report on “Kesari tour & travels management system” benefits in the following manner.

- The manual work is reduced.
- Increase accuracy and efficiency in calculation.
- In this system computer makes your job very easy than manual system.
- The system gives correct results and individual reports.
- The system is user friendly.

Limitations

- User must be familiar with this system.
- The system is not multi-user.
- The system cannot maintain records of credit.
- Return sales is not allowed.
- Data must be entered correctly.
- Computerization of the system may be more expensive and special care must be taken with this.

Suggestions

- The user should have knowledge of the system.
- To start the system user should have entered the correct password.
- This system is safe from corruption because of password facility.

Advantages, Limitations & Future Scope

Advantages:

- This website provides various information about kesari tours and travels.
- Customers can choose tours from variety of travels.
- It is user friendly website and easy to use.
- Customer can search travels with location tours..
- Database is provided in this website so authorized user can access the information.
- This is Dynamic Website.

Limitations:

- Online travels agents can charge commission on every sale.
- This can range between 10 to 20 percent of gross cost.
- Notification not going to customers mobile, that's direct to website.
- This website provide only tours and travels.

Future Scope:

- We will provide the online purchasing Tickets of tours of travel.
- The Enquires send by the customer should be send to the Tours And travels mobile number.
- In this project we also Tours of tickets bookingsystem.
- We can provide Secure facility.
